

**FOR IMMEDIATE RELEASE**  
JUNE 23, 2021

**SPACECOM MOVES TO ORLANDO**  
PARTNERS WITH SPACEPORT SUMMIT FOR JANUARY 2022 EVENT.

**ALEXANDRIA, VA – JUNE 23, 2021** – SpaceCom, the Global Commercial Space Conference and Exposition, announces today that it will be moving its home from Houston, TX and placing itself at the epicenter of space innovation and exploration in Orlando, FL. This strategic move further advances SpaceCom’s position as the premier event in the commercial space industry by enhancing its direct access to key space organizations, tech-forward companies, and mission-critical projects.

In addition to the move to Orlando, SpaceCom will now take place during the first quarter of 2022 – moving away from its historical November timeframe. SpaceCom will be held January 10-12, 2022, at Rosen Shingle Creek in Orlando, Florida.

SpaceCom also announces that it has entered a strategic partnership with the Spaceport Summit (formerly Space Congress®) – produced by the Canaveral Council of Technical Societies (CCTS) in partnership with NASA-Kennedy Space Center (KSC) – that will unite both brands under one event and advance their common mission to promote the growth and development of the commercial space industry, space exploration, and spaceports throughout the world.

With Spaceport Summit’s 48-year legacy of expertise, woven into SpaceCom’s global reach – this will be an unrivaled experience and will undoubtedly solidify the event’s position as the premier global event in the commercial space industry.

“The commercial space industry is evolving at a breakneck pace and SpaceCom continues to evolve with it. Partnering with the Spaceport Summit, and it’s esteemed leadership team, will provide a first-class program and will connect SpaceCom’s audience to the Space Coast’s world-leading commercial space sector. Combining the strengths of both events positions us to better serve our shared mission of promoting the growth and development of a global, sustainable, and diverse commercial space economy,” says Ryan Brown, SpaceCom Executive Director.

“Together, we will power and facilitate the network that makes business in space thrive. We are setting the precedent and the standards of space and earth business integration,” adds Suzy Cunningham, NASA-KSC Strategy & Integration Manager. Suzy has produced The Spaceport Summit the last several years and will co-chair the SpaceCom program committee along with Tina Leighty, Axient LLC’s Quality Compliance Director.

“Partnering with SpaceCom felt like a natural extension to the Spaceport Summit,” says Tina. “With 47 years of expertise, we are expanding accessibility to this world-class program which we hope will greatly advance space commerce overall and our mission objectives on the Space Coast and beyond.”

“We built a strong foundation for SpaceCom throughout our 6-year partnership with the city of Houston and NASA-Johnson Space Center (JSC). We look forward to this next chapter on the Space Coast and continuing to build upon and take advantage of the limitless opportunity that lies ahead of SpaceCom and the commercial space industry,” Chris Harar, President of NTP Events adds.
